Described as "captivating" by "The New York Times" and "unforgettable" by "TIME," "James and Other Apes" was first published in 2004 in a large format to critical and

popular acclaim and is now re-published in this new compact edition. It features fifty close-up portraits of gorillas, chimpanzees, orangutans, and bonobos, shot in the manner of human passport photographs. The images are so strong and the featured apes-all named, with personal histories-are so personable that the viewer cannot fail to relate to them. Includes a moving introduction by the world's leading ape expert and campaigner, Dr. Jane Goodall.
