《颈椎病按摩治疗图解(英文版)》 内容简介: This book is written by experienced

professors and experts who work in Tuina department of Beijing University of Chinese Medicine and in TCM massage department of China-Japan Friendship Hospital, The Ministry of Health. The book consists of 4 parts: introduction to cervical spondylosis, the treatment fundamentals, Massage therapy treatment and cervical spondylosis prevention. The chapter of introduction to cervical spondylosis describes the definition of cervical spondylosis, pathogeny and corresponding pathogenesis as well as the clinical manifestations in details. The chapter of treatment fundamentals introduces the necessary knowledge of meridians and collaterals, acupoints and basic therapeutic manipulations. The chapter of massage treatment comprehensively presents the cervical spondylosis treatment using Chinese massage therapy, and also the writers' opinions on misunderstandings of treatments. The chapter of cervical spondylosis prevention discusses does and don'ts that people need to know when taking care of their necks, how to do self massage and functional exercises for neck.

This book contains a goldmine of information, both its pictures and texts are excellent, the techniques introduced in this book are practical and described in details.

It is intended for clinic doctors, medical practitioners who do grass-root jobs, students who study in schools of Chinese Medicine, as well as for cervical spondylosis patients and their families.
