This book updates the concept of Enlightened Conservatism and creates a paradigm of an organising principle of conscience replacing the convenience that today uses the tactics of political terrorism and economic corruption. It is a book about the power of morality, conscience, the Golden Rule, the Common Good, and looks at personal dignity as the key point. Its essence is a world in which every man gives every other man the respect and rights he wishes for himself. It is implemented by individual responsibility and requires teaching future generations value based systems. Far from a Utopian ideal, it is a very relevant political concept that develops a system of triangles focusing on stability in society as forces of change and structures interest of the great powers of politics, economics, and culture and the methods of analytics, trends and measurement with prioritisation.
