装帧:Paperback

isbn:9780131489530

For courses in Java - Introduction to Programming and Object-Oriented Programming.
The Fifth Edition of this outstanding text is revised in every detail to enhance clarity,

content, presentation, examples, and exercises. Now expanded to include more extensive coverage of advanced Java topics, this new edition is available two ways. Choose the Comprehensive edition (chapters 1-29) that includes the new advanced material or choose the Custom Core version (chapters 1-16) that covers material through exception handling and IO. The early chapters outline the conceptual basis for understanding Java and guide students through simple examples and exercises. Subsequent chapters progressively present Java programming in detail, including using objects for design, culminating with the development of comprehensive Java applications.
