At once a comic masterpiece and a penetrating examination of a mental breakdown, The Double portrays Golyadkin, a petty government official convinced that his "double"—a man who looks just like him, works in his office, and bears the same name, but is otherwise superior to him in every aspect—is ruining his life. With keen psychological insight far ahead of its time, leading to wide misinterpretation among critics upon its first publication in 1846, Dostoevsky's second novel is now recognized as one his most important works and one that inspired nearly hundreds of imitations. Unhappy with the negative reception The Double received, Dostoevsky re-wrote his original version of 1846 fifteen years later. Dostoevsky wrote, "This revision, provided with an introduction, will be the equivalent of a new novel. They will finally see what The Double really is!...In a word, I'm challenging everybody to a battle...Why should I lose a superb idea, a great type in its social importance, which I was the first to discover and of which I was the herald?"
