著者:Bernard R. Gelbaum

出版者:Springer

出版时间:1992-06-18

装帧:Hardcover

isbn:9780387977669

This text covers many principal topics in the theory of functions of a complex variable. These include, in real analysis, set algebra, measure and topology, real- and complex-valued functions, and topological vector spaces. In complex analysis, they include polynomials and power series, functions holomorphic in a region, entire functions, analytic continuation, singularities, harmonic functions, families of functions, and convexity theorems.
