Babies are not born talking, they learn language, starting immediately from birth. How

does this process take place? When do children master the skills needed for using language successfully? What stages do they go through as they learn to understand and talk? Do the languages they learn affect the way they think? This new edition of Eve Clark's highly successful textbook focuses on children's acquisition of a first language, the stages of development they go through, and how they use language as they learn. It reports on recent findings in each area covered, includes a completely new chapter on the acquisition of two languages and shows how speech to children differs by social class. Skilfully integrating actual data with coverage of current theories and debates, it is an essential guide to studying language acquisition for those working in linguistics, developmental psychology and cognitive science.

作者介绍:

EVE V. CLARK is Richard W. Lyman Professor in the Humanities and Professor of Linguistics at Stanford University. Her book include Psychology&Language(with H.H.Clark), The Ontogenesis of Meaning, The Acquisition of Romance, The Lexicon in Acquisition, and Constructions in Acquisition(with B.F.Kelly). She is an ative researcher in the field who works on all aspects of meaning acquisition.

评论

读多了communicative view渐渐明白，老乔虽然伟大，也不是万能的。

说实话，个人觉得写得一般，很多章节不断重复之前已经讨论过的内容，说来说去就是communicative approach，精彩论述之处不算多。另外，全书根本没有试图去解释，儿童究竟怎么习得语言学家都解释不清楚的语法现象的，例如英语冠词，英语短语动词。而这个才是困惑我很久的问题。

语言学作业罢了 只读了15，16章 个人觉得还挺入门 但我不喜欢他的论证方式
