著者:Michael Coe

出版者:Facts on File

出版时间:1986

装帧:Hardcover

isbn:9780816011995

While beginning with the European conquest and ending with Native American survivals, this atlas mostly concerns the prehistoric archaeology of North, Middle, and South America. Interspersed with shaded relief maps showing site locations, style zones, and cultural boundaries are sections on special topics and major sites. An extensive, well-researched text unites the maps, illustrations, and feature sections so successfully that this book can be recommended as the best available introduction to Native American prehistory. It is the first such atlas for the New World, and most libraries should have it.William S. Dancey, Anthropology Dept., Ohio State Univ., Columbus

评论

最忘不了的是那如雨般的箭林和积泪成湖的Siege of Tenochtitlan.
1200西班牙人征服了百万人的Aztec和3000年的中美文明, 可惜在书里一行带过.
