装帧:Paperback

isbn:9788881587308

This book offers an unparalleled look at the latest finished work of groundbreaking artist James Turrell, who forces us to reconsider our perceptions of light and space. James Turrell is an American artist who works primarily with light and space - and how they are perceived. He came to prominence in the 1960s with a series of pioneering exhibitions, and is probably best known for his as yet unfinished project in an extinct volcanic crater in Arizona - Roden Crater. This superbly illustrated volume takes readers on an unparalleled behind-the-scenes tour - from conception to realization - of his latest finished work, "Second Wind 2005", which opened in May 2009 at the NMAC Foundation, Montenmedio, Spain.
