Inside the World's Credit Agencies is a user-friendly guide for business executives who need a quick understanding of the extensive sources of export financing support from approximately 40 of the world's largest trading countries. It provides a brief explanation of the government agencies programs (i.e. type of export financing, eligibility, terms, fees, etc.) and specific contact information for next step action. In addition, there are a number of case studies that provide examples of how these government programs have successfully been used. This book will be an important resource guide for anyone involved in financing cross-border transactions.
