出版者:Springer

出版时间:2001-10

装帧:Paperback

isbn:9789624301366

This volume presents a collection of review articles on the use of photosynthetic microorganisms in environmental biotechnology. The main theory explored in the book is the use of photosynthetic microorganisms, which are able to utilize solar irradiance for the transformation of carbon substrates, to solve environmental problems. The book emphasizes the importance of sustaining the natural environment with industrial development.
