isbn:9781600610431

The images of places - large and small, far and near, ordinary and extraordinary - dominate this book. Each chapter includes substantial brainstorming prompts, production notes, and how-to topics. Readers will be inspired by images include sweeping views of natural and manmade environments, as well as intimate shots of intriguing details. The book includes both on site shooting techniques and post-shooting digital treatments to show readers how to create their own striking photographs.
