Updated to reflect questions and question types on recent tests, this workbook presents hundreds of math questions in both multiple-choice and grid-in formats with worked out solutions. These exercises with answers will hone students' math skills and prepare them to excel when they take the actual SAT. The author also suggests special math strategies to help test takers approach and correctly answer question types that might be unfamiliar to them. Here is intensive preparation for the SAT's all-important Math section, and a valuable learning tool for college-bound students who need extra help in math.

如果是为了把七百多分得数学单项提高到800分而做这本书，真的没必要，没多大用啊
