isbn:9781592237197

The Amazon rain forest is one of the world's most captivating environments — particularly for children. In this colorful book, budding zoologists use the 51 included pieces to assemble eight exotic animals, from the silent jaguar to the leaping monkey to the rare and beautiful pink river dolphin. A detailed removable diorama serves as a backdrop for exciting adventures that young readers share with their new friends. In the process, they learn all about these fascinating animals and their habitat while crafting a museum-ready display.
