isbn:9781594630705

New York Times bestselling author Danica McKellar tackles the toughest math class yet: Algebra!

In her two bestselling books, *Math Doesn't Suck* and *Kiss My Math*, actress and math genius Danica McKellar shattered the "math nerd" stereotype by showing girls how to ace middle school math-and actually feel cool while doing it!

Sizzling with Danica's trademark sass and style, *Hot X: Algebra Exposed* tackles algebra: the most feared of all math classes and the most common roadblock to high school graduation. McKellar instantly puts her readers at ease, showing teenage girls-and anyone taking algebra-how to feel confident, get in the driver's seat, and master topics like square roots, polynomials, quadratic equations, word problems and more . . . without breaking a sweat (or a nail).

Danica provides illuminating, step-by-step math lessons combined with reader favorites like personality quizzes, popular doodles, real-life testimonials, and stories from her own life, so girls feel like she's sitting right next to them. As hundreds of thousands of girls already know, Danica's irreverent, light-hearted approach opens the door to higher grades and higher test scores. Now, with *Hot X: Algebra Exposed*, the scary veil of algebra is finally lifted, making it understandable, relevant and maybe even a little (gasp!) fun for girls.
