The "Just" series is an integrated series of four books that can be used on their own, in any combination. When used together they make a complete course with a consistent

learner-centred approach. Aimed at intermediate learners, the series can be used as general preparation and revision for exams at this level. This book is designed for individual language skills development as part of either a class or self-study programme. An audio CD is included featuring vocabulary exercises, an audio script and a full answer key.
