This is a fascinating practical watercolour workbook that explores the approaches and techniques required to develop your flower painting skills and explore your own creativity. The first section acts as a foundation course, clearly explaining the materials,

theory and techniques you will need to master the basics, experiment with design and think creatively about colour. The second section takes you through five detailed step-by-step projects, each looking at key aspects of accomplished flower painting and exploring the techniques required for successful work along the way. Jill Bays shares her extraordinary talent and passion for painting flowers as she moves smoothly from traditional representations through to more creative free painting.
