One of the foremost sculptors of his generation, Nigel Hall's preoccupation with space and balance has led him to create some of the most beautiful works of sculpture in the last thirty years. The first comprehensive survey of Hall's work, this beautifully produced book includes an extensive selection of images, not only of finished work, but also of working drawings that reveal Hall as a consummate draftsman. As he considers the artist's early spatial constructions and most recent public pieces, author

Andrew Lambirth thoughtfully examines the artist's career, providing insight into his development and working method. Hall's sculptures are in the collections of many American museums.Hall's work is in the following North American collections: The Museum of Modern Art, New YorkThe Art Institute of ChicagoDallas Museum of Fine Art, TexasLos Angeles County Museum of Art, California
