Having both developed from C, C++ and Java share many similarities; this book is based on the premise that learning the programs by comparison is more efficient, allowing users to access the strengths of both languages. Based on a highly successful course at Purdue University. Suitable for programmers familiar with C++ or Java who wish to enhance their programming skills as well as for those with no knowledge of either language.

书评

有人说，“Java与C++是貌合神离，与Smalltalk才是心有灵犀”。关于C++和Java的争论，历来都是程序员口水战的良好素材之一。记得我大三大四在实验室给老师干活时候，实验室的学长带一个新来的员工，问了一句话我至今印象颇深：“你会不会C++？会C++就会Java，都一样的”。...
