There is need for change in our currently unsustainable cities. Carefully outlining paths

towards better, sustainable ways of urban living, this book proposes a radical change in the ways we conceive and live our urban environments. Bringing together diverse cultural and disciplinary views on urban sustainability, eighteen leading academics and practitioners in sustainable architecture and urbanism explore global concerns of sustainability and urbanity. This broad range of issues are clearly articulated and linked to concrete places and projects, merging research and cutting-edge design investigations to promote environmentally and culturally sensitive urban futures.
