isbn:9781856696418

Detail in Contemporary Timber Architecture provides analysis of both the technical and the aesthetic comportance of details in modern timber architecture. Featuring the work of renowned architects from around the world, this book presents 50 of the most recently completed and influential timber designs for both residential and commercial architecture.

Each project is presented with color photographs, site plans, and sections and elevations, as well as numerous construction details. There is also a descriptive text, detailed captions, and in-depth information for each project, including the location, client, architectural project team, main consultants, and contractors.

The projects are presented in clear and concise layouts over four pages. All of the drawings are styled in the same way and presented at standard architectural scales to allow for easy comparison. There is also a CD-ROM that contains all the drawings as printed in the book, in both EPS and DWG (generic CAD) formats. In addition, the book features an index of architects that includes the name, address, and all contact details for each architect included.
