isbn:9780713639667

Covers almost 260 species of gamebird from around the world. There is detailed and meticulously researched information for all of these, concentrating on identification, status and distribution, habitats, and geographical variation. The 72 colour plates (by Norman Arlott, Robin Budden, Daniel Cole, John Cox, Carl D'Silva, Kim Franklin and David Mead) depict plumages of males, females and immatures, and show the most distinct races where relevant. This is the first time all of the species have been treated in one volume, and the first time many of these birds have been illustrated at all.

评论

鸟类爱好者白日梦工具书。要更感谢能多画一些生境图的插画师～

质量没得说，基本涵盖了所有已知类群，书的前半部分以插图为主，细致地描绘了不同物种之间的差异而，书的后半部分，以文字记述为主，包括了该物种的分布和习性等。缺点在于太过厚重了，如果这本书可以分成两部分，前半部分为纯图鉴，也轻便些，方便出野外，那就更好了。
