

Theory Of Quantum Liquids (Advanced Book Classics) (v. 1 & 2)

[Theory Of Quantum Liquids \(Advanced Book Classics\) \(v. 1 & 2\) 下载链接1](#)

著者:Philippe Nozieres

出版者:Westview Press

出版时间:1999-11-18

装帧:Paperback

isbn:9780738202297

Describes the qualitative and unifying aspects of an extremely broad and diversified field. Deals with Landau's Fermi liquid theory, and its application to ^3He and electrons in metals. Provides a detailed treatment of Bose condensation and liquid ^4He , including the development of Bose liquid theory. Softcover.

评论

读过第一册。图像清晰，李正中书第4章的升级版。Pines是牛人，这些工作主要是他做的。
