For readers tired of their non-descript, platinum-colored PC case who want to wring every ounce of performance out of their timid PC? This book shows readers how to reach PC mod nirvana step-by-step, from selecting (or making) the perfect case, to installing neon/cold cathode lighting, liquid cooling and more. Then, it shows readers

how to drain every last drop of performance from their PC - from simple settings within BIOS and Windows, to more fringe overclocking techniques. For people who live and die on the cutting edge of PC hardware hacking technology, then this book is a must-have. No other book combines PC mods and overclocking into one, indispensable book. Best of all, this book was written by the two top voices in PC hardware technology - Maximum PC and Que! This incredibly original book covers the following topics:-Customizing PC cases with see-inside windows-Installing neon/cold cathode lighting-Liquid cooling-Installing custom case fans, hard drive fans and more-Custom cabling-BIOS tweaks-Windows tweaks-Overclocking-Benchmarking
