Review

People Out of Place analyzes the interaction of two traditions of rights--those nested in the nation state and available to citizens and those available to all human beings by virtue of their moral equality--and brilliantly illuminates the impact on them of the processes we label globalization. This is not a collection of loosely related essays, but a tightly integrated multiplication of insights into the thinning out of citizenship rights through reduced state control over markets. For me this book exemplifies social science in the service both of imaginative and objective inquiry and of humane empathy.

-Tom Farer, Dean of the Graduate School of International Studies, University of Denver

A collection of insightful essays on the ways in which globalization has altered citizenship in the contemporary world....People Out of Place is a worthwhile and provocative read.

-Perspectives on Political Science

Both timely and important, People Out of Place is a great collection of empirically rich, theoretically sophisticated, and accessible essays on some of the fundamental problems of our time. Unafraid to ask big questions and to entertain bold alternatives to the status quo, Brysk and Shafir's book is a significant addition to the literature examining the costs, contradictions, challenges and opportunities facing those struggling to give weight to human rights, and to increase the protections of migrants and second-class citizens in an increasingly globalized world. This is a valuable resource for undergraduate and graduate students alike, as well as for researchers and activists.

-Joseph Nevins, Department of Geology and Geography, Vassar College, and author of Operation Gatekeeper

Product Description

Globalization pushes people "out of place"--across borders, out of traditions, into markets, and away from the rights of national citizenship. But globalization also contributes to the spread of international human rights ideas and institutions. This book analyzes the impact of these contradictory trends, with a focus on vulnerable groups such as migrants, laborers, women, and children. Theoretical essays by Richard Falk, Ronnie Lipschutz, Aihwa Ong, and Saskia Sassen rethink the shifting nature of citizenship. This collection advances the debate on globalization, human rights, and the meaning of citizenship.
