The second installment of the multivolume "Handbook of Detergents" deals with the potential environmental impact of detergents as a result of their production, formulation, usage, consumption, and disposal. This volume forms a comprehensive treatise on the multidimensional issues involved and emphasizes the alignment of scientific knowledge with the relevant contemporary data and methodologies in toxicology, ecotoxicology, and environmental risk assessment. With contributions from over 50 experts worldwide, this volume discusses industry procedures involving surfactant and detergent treatments and explores global concerns centering on recent legislative and regulatory developments.
