Is there healing beyond the walls of a modern hospital? Healing Places looks at how different environments affect our physical, mental, spiritual, social, and emotional healing. It sets out four dimensions found in healing environments-natural, built, symbolic, and social-and applies these ideas to three places that achieved a lasting reputation for healing: Epidavros in Greece, Bath in England, and Lourdes in France. Gesler's engaging and innovative approach draws from a variety of fields, from geography and environmental psychology to medicine, sociology, and anthropology. Comparing these healing places to today's hospital, Gesler shows that place and healing are inextricably linked and advocates that health care should go well beyond biomedical solutions.
