Almost 20 years ago, a Harvard-trained neurosurgeon named Norm Shealy was introduced to Caroline Myss, a young woman with a special gift: she could "see" illness in other people with only her intuition to guide her. After extensive testing, Dr. Shealy concluded that her ability to diagnose illness—even from remote distances—was 93 percent accurate. Now, in a major publishing event, these two pioneering voices are together again in a revolutionary self-care curriculum, *The Science of Medical Intuition*. First presented by Myss and Shealy at a series of influential workshops, *The Science of Medical Intuition* is designed to help you take control of your total health through intuitive self-diagnosis and healing techniques. Complete on 12 enriching sessions—more than 12 hours of learning—here is the only course that covers every phase of Myss and Shealy's groundbreaking approach to self-care. Note: Completion of this course is a prerequisite for further studies of medical intuition with Caroline Myss and Norm Shealy. In addition, we recommend listening to *Energy Anatomy* (page 18) before ordering.
