The ripple effect of hope and healing--which begins within each of us--extends outward through our relationships with the power to transform the world. This is the vision and promise of Blackwolf and Gina Jones in their latest book, Sacred Self, Sacred Relationships. Drawing upon Native American teachings as well as their professional work in the fields of health and spirituality, the authors explore how global change begins with personal change. Through our loving commitment to improve ourselves and heal our relationships, we become engaged in the process of changing the world for the better--today and tomorrow. Key features and benefits: authors lecture widely on Native wisdom and spirituality explores the concept of how to effect positive change imparts a hopeful, empowering message
