Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how longterm sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about companies that are not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? Are there those that convert long-term mediocrity or worse into long-term superiority? If so, what are the distinguishing characteristics that cause a company to go from good to great? Over five years, Jim Collins and his research team have analyzed the histories of 28 companies, discovering why some companies make the leap and others don't. The findings include: Level 5 Leadership: A surprising style, required for greatness. The Hedgehog Concept: Finding your three circles, to transcend the curse of competence. A Culture of Discipline: The alchemy of great results. Technology Accelerators: How good-to-great companies think differently about technology. The Flywheel and the Doom Loop: Why those who do radical restructuring fail to make the leap.

是本老书，但不论他选取的例子是否存在样本的偏差，最起码，总结的东西，首先逻辑合理，其次，即使是现在，也不过时，不过时的原因是，仍然只有少数公司做到了他的建议。
