Book Description

The Magic School Bus was a series of children's books intended to teach scientific concepts to children. The books feature the exploits of Ms. Frizzle and her class of students at Walkerville Elementary School who board a magical school bus which takes them on educational adventures to space, under the Earth, into the human body, or to other such locations. The books were written in the first person from the point of view of an unnamed student in the Friz's class.

Synopsis:

Count on Ms. Frizzle to teach anything but an ordinary lesson on meteorology. Flying through the clouds in the Magic School Bus, Ms. Frizzle's class experiences a hurricane-and even a tornado-firsthand. During their thrilling ride through the sky, Arnold gets lost! Will the Friz be able to save the day this time?

From School Library Journal

Grade 1-3-Another wild and wacky field trip for Ms. Frizzle and her intrepid

students-this time into the eye of a hurricane. The magic school bus changes into a weather balloon and then into an airplane as the class experiences the hurricane and a spin-off tornado firsthand. As usual, Ms. Frizzle's wardrobe is as changeable as the weather. The familiar format features lots of weather information delivered via students' written reports and spoken comments (dialogue balloons). A subplot features the hapless Arnold, who becomes separated from the group with only Ms. Frizzle's talking radio for company. He survives several harrowing adventures before the magic school bus/plane picks him up. All ends well, the class celebrates with a party, and the Frizz has bees in her bonnet as she anticipates the next class project with a new outfit.

Eunice Weech, M.L. King Elementary School, Urbana, IL

From Booklist

Resplendent in a sunflower frock and sunflower earrings, Ms. Frizzle is ready to conduct a new crop of kids onto her unusual bus. This time, it's a trip into the clouds to gather facts about hurricanes--firsthand. When her bus transforms itself into a hot-air balloon (and later into a weather plane) to take a close look at "one of the world's hurricane breeding grounds," the kids, especially Arnold, realize this won't be an ordinary lesson in meteorology. As is usual in the Magic School Bus series, Cole presents the science in easy-to-understand terms, with Degen clarifying the concepts and adding comic relief through double-page-spread pictures that brim with details. It's a great combination of fantasy and science made even better by the fact that the layout of the book makes it easy for readers to tell the difference.

Stephanie Zvirin

Midwest Book Review

A tropical storm catches the Magic School Bus inside the eye of its hurricane, providing firsthand information on changes taking place in air, sea and land. Science questions and handwritten facts presents basic concepts in the usual lively and fun Magic School Bus manner.
