Hunting and gathering is humanity's first and most successful adaptation. Until 12,000

years ago, all humanity lived this way. Surprisingly, in an increasingly urbanized and technological world dozens of hunting and gathering societies have persisted and thrive worldwide, resilient in the face of change, their ancient ways now combined with the trappings of modernity. The Encyclopedia is divided into three parts. The first contains case studies, by leading experts, of over fifty hunting and gathering peoples, in seven major world regions. There is a general introduction and an archaeological overview for each region. Part II contains thematic essays on prehistory, social life, gender, music and art, health, religion, and indigenous knowledge. The final part surveys the complex histories of hunter-gatherers' encounters with colonialism and the state, and their ongoing struggles for dignity and human rights as part of the worldwide movement of indigenous peoples.
