This Anthology, intended to accompany *A Companion to Metaphysics* (Blackwell, 1995), brings together over 60 selections which represent the best and most important works in metaphysics during the last century. The selections are grouped under ten major metaphysical problems and each section is preceded by an introduction by the editors. Some of the problems covered are existence, identity, essence and essential properties, "possible worlds", things and their identity over time, emergence and supervenience, causality, and realism/antirealism. The coverage is comprehensive and should be accessible to those without a background in technical philosophy.

## 评论

大部分最重要的文章也都选里了，组织也算有条理，但觉得编排上还是多少有点问题。比如，第一部分最好是元存在论问题，但和存在论的问题一道都被并入存在一章。章头导读也有点不痛不痒，没什么营养。
