

# Chemistry of Nonaqueous Solutions

[Chemistry of Nonaqueous Solutions\\_下载链接1\\_](#)

著者:Mamantov, Gleb/ Popov, Alexander I. (EDT)

出版者:

出版时间:1994-8

装帧:

isbn:9780471185697

This book can be related topically to VCH's book O'Donnell: Superacids.

This monograph, written by eminent specialists in the field, covers the latest aspects of the chemistry on nonaqueous solutions. Nonaqueous solutions are important in many applications, batteries in particular.

Reason to publish:

This book fits into core VCH chemistry publishing list (inorganic) and can be co-promoted with such titles as: O'Donnell: Superacids; Gileadi, etc.
