Can human beings agree on even the most fundamental concepts? How will our generation be judged by history five thousand years from now? Where on Earth is the correct version of a Human being from? Explore the new concept of "geochauvinism" and the role it plays in your life. Have you experienced the gripping fear of an angry violent mob or have you experienced the miracle of help, in time of need, from a complete stranger? Read the topic, "Group Mentality with Rapid Generalization" and review the broad range of effects this attitude has on your daily life. Who knows? When it comes to belief systems, the question of who is right pales in comparison to the horror of how people will treat each other over the unknown answer. When you consider the small percentage of individuals who have entrapped the entire planet in an endless cycle of violence, this represents an extra-ordinary reality. Read the topic called "Rotten Apples." The need to be right and in charge is a male feature of epic proportion. Is murder in the name of ideology, property, and power ruining a perfectly good planet Was the blaming of women for the fall of mankind one of the greatest tragedies of history? This topic is covered in detail in. "Reverse Eden." Remember that women and children represent the majority of people on Earth. Can we agree? What is the most fundamental concept on which most people would agree? The universe is watching us at a great distance. What will human beings become in the next five thousand years? The universe has all the time in the world...literally.
