Driving radio-control cars is an enjoyable hobby and also a competitive sport, but the vast range of different types of models now available can prove confusing for those new to the scene. This extensively illustrated book starts by providing all the

information needed to choose the right model, and goes on to present advice on how to build kits as well as driving techniques, maintenance, modifying, set-up and the various different classes of racing. This book is an essential reading for those contemplating buying their first model and for those already involved in the scene looking to progress to the next level.
