装帧:

isbn:9780060786014

The Number One international bestselling author of Jurassic Park, Congo and Sphere takes on global warming in this gripping and critically acclaimed thriller. The "Crichton effect" -- this term has come to signify the distinctive blend of fear, fantasy, and authentic cutting-edge science driving the blockbuster novels of Michael Crichton. Hailed as "the father of the techno-thriller", Crichton boasts an impressive history of global bestsellers -- from The Andromeda Strain to Jurassic Park to Prey -- that explore the frightening possibilities of breakthrough research led astray by abuse and corruption. Drawing on his past as a Harvard Medical School student and his ongoing study of the world of technology, Crichton's gripping fiction is grounded in scientific fact culled from the latest academic journals.
