In this deeply affecting, beautifully crafted collection of short fiction, Bret Lott broadens his stylistic range, striking a surprisingly surreal tone with stark, hyperrealistic prose. As story after dazzling story deliberately takes you down a deceptively ordinary path, the arresting center of each startles your unsuspecting sensibility.

Among the narrative gems is “Family,” in which a husband and wife bicker incessantly before realizing that their two children are missing, only to discover them in a surprising place—and in a disturbing condition. In “Everything Cut Will Come Back,” a long-distance phone call between two brothers takes a turn when their own tragic past crackles over the line. In “History,” a widow thinks she spots her son at the airport and is left instead with a simple memory of her late husband that resolves her grief. The innocence of three boys is lost when they witness a devastating winter tragedy in “The Train, the Lake, the Bridge.”

Within these pages, adulterers are unceremoniously caught, epiphanies arrive during bizarre encounters, and characters move through everyday moments with a fortitude that elevates these stories almost to mythical status. Without a stroke of false sentimentality, *The Difference Between Women and Men* will leave you strangely

shaken—and ever aware of the odd permutations of humankind.
From the Hardcover edition.
