Matt Goss has been a staple part of British tabloid life for years—yet, the general public has had no idea of the astounding life that he has led behind the headlines and sound bites. Here, for the first time, he takes them into his confidence and reveals the true extent of his own astounding tale. Matt was brought up in a financially frustrated south London family, but fortunes changed rapidly he helped create Bros—a band that sold sixteen million records in an intensely chaotic and record-breaking reign over the world's pop charts. Yet after those bizarre and insane times, Matt's life became even more tempestuous, crammed with inner fear, personal revelation and unforeseen challenges. This is the account of a man who can truly say that he has experienced the highest of highs and the lowest of lows.
