Due to a lack of proper documentation, low blood quantum, tribal politics or other reasons, hundreds of thousands of Americans of indigenous descent are unable to join a federally recognized tribe. Instead, they exist in a kind of legal and ethnic limbo, living as multiracial individuals and families in a country that does not fully acknowledge their multiracial heritage. Living outside of the system, they walk their own unique roads to preserve, reclaim and celebrate their heritage. Some lead extraordinary lives as traditional artisans, pow wow dancers, educators, activists or community elders. Others choose to honor their heritage privately, observing family traditions, reclaiming lost knowledge, or just remembering in solitude those who came before them. Invisible Indians explores the oral histories, personal experiences and opinions of this remarkable, yet largely misunderstood, segment of Native American society.
