A young prince is forced to choose between his own life, and that of his ancestor's as expertly, and some say hellishly, planned forces begin to usurp the throne that has been ruled by his blood for eons. His struggle to learn the truth behind recent deaths, and restore some order to a turbulent land, is aided and yet tossed by a mysterious cleric who tries to bring him comfort and assistance, while bringing a greater knowledge of his own savior to the world. The boy is torn between his own desires, the needs of his people, and the legacy his family has left for him.
