What does the Judeo-Christian tradition have to say about a responsible ethics of technology? In these pages, Schuurman discusses the need for an ethics of technology and the spiritual-historical background of modern technology. The spirit of the Enlightenment has produced a scientific-technological picture of the world, with an ethical mix of values and norms that is still current. But there are alternative approaches. After drawing attention to the cosmological and the ethical deficiencies in contemporary ethics, Schuurman makes a case for a different approach that starts with the "enlightenment of the Enlightenment," that addresses these deficiencies, and that implies a cultural paradigm different from the current one. He frames ethics as an ethics of responsibility and highlights the priorities, values, and norms that such an ethic implies. He also speaks to concrete possibilities inherent to this approach that could reorient our technological culture and that would lead to political changes as well. His is a new perspective that will undoubtedly involve struggle, but it also affords hope.
