Your comprehensive guide to remarkable achievements in space Do you long to explore the universe? This plain-English, fully illustrated guide explains the great discoveries and advancements in space exploration throughout history, from early astronomers to the International Space Station. You'll learn about the first satellites,

rockets, and people in space; explore space programs around the world; and ponder the controversial question: Why continue to explore space? Take a quick tour of astronomy -- get to know the solar system and our place in the galaxy, take a crash course in rocket science, and live a day in the life of an astronaut Run the Great Space Race -- trace the growth of the Space Age from Sputnik to the Apollo moon landings and meet the robots that explored the cosmos Watch as space exploration matures -- from the birth of the Space Shuttle to the creation of the Mir Space Station to successes and failures in Mars exploration, see how space programs reached new levels Journey among the planets -- check out the discoveries made during historic voyages to the inner and outer reaches of the solar system Understand current exploration -- review the telescopes in space, take a tour of the International Space Station, and see the latest sights on Mars Look into the future -- learn about upcoming space missions and increased access to space travel Open the book and find:  
Descriptions of space milestones and future missions An easy-to-follow chronological structure Color and black-and-white photos The nitty-gritty details of becoming an astronaut A grand tour of the solar system through space missions Explanations of tragedies and narrow escapes Facts on the creation of space stations by NASA and the USSR Ten places to look for life beyond Earth

评论

小时候的理想是当个宇航员，现在虽然做着完全不同的职业，却也挡不住自己对太空的向往，有好多知识要补上，先从这本简单的开始吧。  
时间过得很快，这本书是2009年出的，现在2015年了，有很多可以更新了。比如，NASA的猎户座航天器好像还没有上天，中国的玉兔着陆器已经在月球上了，IIS国际空间站依然还好好的在天上。
