Featuring more than 100 quirky innovations and inventions, this visual showcase captures a great can-do spirit and creative energy. All the clever amateur creators profiled here brought their ideas to life right in their own homes; the fruits of their imagination range from the useful (a "Finger Shield" for when you're chopping food) to the offbeat (a nappy for your pet bird). There are items for people on the go, to help you look your best and to make life easier at home - and electronics too. Get the background story on every invention, along with a statistics-filled sidebar, photographs, illustrations and diagrams to add to the fun!
