"Just as the title says this book is an essential 'must have' for any student healthcare professional or even those who are qualified and want to refresh their calculation skills. It is very easy to read, being clearly laid out and aided with illustrations and photographs throughout. There is also a variety of worked examples and practice questions which I feel makes this book stand out from the crowd, as you can assess yourself as you go along to check that you are on the right track. As a child branch nursing student, I particularly loved how this book covers specific scenarios in paediatrics, from the use of graphs when plotting growth charts to infant fluids, including all types of infant feeds (bolus, continuous or intravenous). There are also worked examples and practice questions for more specialist areas such as high dependency, neonates and paediatric intensive care unit." Cheryl McCullough, Student Nurse, Queens University Belfast, UK "This book has been an enormous help throughout revision time. It is a simple guide to learning a variety of calculations such as division, multiplications, ratios, and percentages; all of which are in constant use in healthcare settings. The book is well crafted, composing of easy to understand terms and techniques to carry out calculations. It uses scenarios which cater specifically for nurses and other healthcare professions by using common drugs and dosages. It also offers tips on medication safety and attempts to integrate practice with theory by including Nursing and Midwifery codes and NHS guidelines." Erin Tierney, Nursing Student, Swansea University, UK "This book is suitable for those preparing for entry to healthcare programmes as well as those undertaking pre-registration programmes, post-registration courses and those just needing to make a 'quick check' whilst in practice. Clear step-by-step explanations are given to each of the exercises, demonstrating a variety of strategies to arrive at the same answer. Each chapter gives clear examples as to when the calculation would be used which helps the reader to link theory and practice." Nicci Whiteing, Lecturer in Adult Nursing, School of Community & Health Sciences, City University, London, UK "Designed for use by students of all branches of nursing and midwifery, this book covers the calculations they need to know with remarkable clarity. Written to engage with students' learning in both theory and practice, it is ideal for all those entering the nursing or midwifery register." Philip Scullion, Department of Nursing, Midwifery and Health Care, Coventry University, UK "There are easy to understand worked examples in each section along with practice exercises. All of the practice questions have been put in the context of real life situation which makes them easier to understand. I would recommend this book to anyone undertaking a pre registration nursing or midwifery course, I found it extremely useful in helping me to prepare for my recent drug calculations exam." Nina Griffiths, Nursing Student, Swansea University, UK
