This timely, authoritative volume provides an integrative review of current knowledge on child and adolescent depression, covering everything from epidemiology and

neurobiology to evidence-based treatment and prevention. From foremost scientist-practitioners, this book is organized within a developmental psychopathology framework that elucidates the factors that put certain children at risk and what can be done to help. Proven intervention models are discussed in step-by-step detail, with coverage of cognitive-behavioral, interpersonal, and pharmacological approaches, among others. It features special topics that include sex differences in depression, understanding and managing suicidality, and the intergenerational transmission of depression.
