Too many people flunk retirement - even after a lifetime of hard work and careful saving. Why? Because they only plan to meet their financial needs and overlook the emotional planning that will make them truly happy in this next stage of life. The key to a successful retirement lies in your personality not your bank account. My Next Phase offers readers a revolutionary, step-by-step process to figure out their personal 'Retirement Style' and shows how to use that information to create a retirement plan tailored to their unique personality
