Communities That Learn, Lead, and Last offers a fresh and compelling perspective while providing practical guidance for schools and districts on how to develop "professional learning communities" that serve to instill educational ideals, share

wisdom, improve practice, and enhance capacity across the system. Comprised of any combination of teachers, school leaders, staff developers, district personnel, and even students, professional learning communities, as described in this book, break new ground and challenge the status quo by focusing on the reconciliation of individual and organizational expertise, vision, and needs through a variety of collaborations, activities and projects?ranging from classroom-related work to broader issues of policy, leadership, and organizational improvement. Depending on their needs, maturity, purpose, and membership, professional learning communities can be centered on learning, leading, or lasting. Showing how such communities can become the means for improving teaching and learning, as well as promote and sustain educational innovations, the book maps out the community-building essentials, providing guidance, tools, and carefully crafted rubrics.
