The first part of the book (part I & II) will be used to provide an overview of the NetSuite system and give the users an idea on how it can be used to improve business processes. The second part of the book (part III & IV) will provide specific instruction on how to use the various parts of the system, configure the application using the "click,

not code" capability and answer questions about how the system can be extended and integrated into other systems. Table of contents: Part I: NetSuite Basics

Part II: Tracking Money and Resources

Part III: Marketing and Driving Sales

Part IV: Taking Care of Your Partners and Customers

Part V: Selling Online

Part VI: Dashboards, Searches, and Analytics

Part VII: The Part of Tens
