"This book should be immensely interesting to those trying to decide what MANET research is worth undertaking and why."

*Projects Agency (DARPA) Strategic Technology Office

*Mobile ad hoc networking is a hot topic, gaining importance in both commercial and military arenas. Now that the basics in the field have settled and standards are emerging, the time is right for a book on management of these networks. From two experts in the field, Policy-Driven Mobile Ad hoc Network Management provides comprehensive coverage of the management challenges associated with mobile ad hoc networks(MANETs) and includes an in-depth discussion of how policy-based network management can be used for increasing automation in the management of mobile ad hoc networks.

*?Network management requirements for MANETs, with an emphasis on the differences between the management requirements for MANETs as compared to static, wireline networks

*?Policy conflict detection and resolution

*?Methodologies for providing survivability in the face of both hard and soft failures in MANETs

*?Important open research issues in the area of MANET management

Policy-Driven Mobile Ad hoc Network Management is an ideal resource for professionals, researchers, and advanced graduate students in the field of IP network management who are interested in mobile ad hoc networks.
